

Design for the Environment Textiles

The Design for the Environment protocol is a fundamental part of the Herman Miller product development process. Herman Miller Textiles are evaluated and optimized for human and environmental impacts.

Textiles described in this document meet the criteria for the following building standards: International Living Building (ILBC) Red List, WELL Building Standard Version 2, and Healthier Hospitals 2.3.

International Living Building™ Red List

Herman Miller makes every reasonable effort to ensure that the data is accurate and current. The information Presented as Red List Free indicates that the chemical is not Present in the product above 100ppm.

Full Red List and CAS# can be found [here](#).

WELL Building Standard™ Version 2

X05 Enhanced Material Restrictions:

- Textiles and plastics contain 100 ppm or less of HFRs, PFAS, Lead, Cadmium, and Mercury

X06 VOC Restrictions:

- Meets CDPH Standard Method v1.2 or ANSI/BIFMA e3-2014, sections 7.6.1 or 7.6.2

X08 Materials Optimization:

- Free of compounds listed in the Living Building Challenge's Red List

Healthier Hospitals 2.3

Textiles described herein meets the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Greenhealth does not verify manufacturer information:

Ensure that 30% of the annual volume of Freestanding furniture and medical furnishings, purchased, based on cost.

- Flame Retardants (FR): Product does not contain added flame retardant chemicals at levels above 1,000 parts per million by weight of the homogeneous material, excluding electrical components.
- Formaldehyde: comply with ANSI/BIFMA e3-2011 7.6.1 and 7.6.2.
- PFAS: Must not use stain or water repellent treatments that contain per- or poly-fluorinated alkyl substances.
- PVC: Product contains less than 1% of polyVinyl chloride (PVC) by weight, excluding electrical components.
- Antimicrobials: Must not contain any added antimicrobials. Triclosan and triclocarban are explicitly prohibited for all uses.
